

AI Meeting Transcript Processor

Turns raw meeting transcripts into clean summaries, action items & decisions.

WHAT IT DOES & WHY

Every day the team runs client briefs, campaign reviews and syncs. Afterwards someone is supposed to write up notes and post action items, but it rarely happens consistently. Notes get messy, tasks get forgotten, and there's no single place to see what was decided.

Why we built this

Meeting notes were inconsistent and action items often got lost in chat threads. MeetGest standardizes the write-up and makes ownership clear, so decisions and follow-ups don't slip.

The 30-second catch-up. Anyone who missed a meeting can read the summary, see who owns what, and know exactly what was decided, without watching a recording or chasing people.

WHY IT MATTERS

A familiar moment, before and after.

BEFORE

"Who agreed to this change?"

Nobody's sure. Someone scrolls through chat history. 20 minutes gone, and the answer is still fuzzy.

AFTER

Open MeetGest. Find the meeting.

The decision, and who made it, in seconds.
Every action item already has an owner.

POTENTIAL IMPACT

- ✓ Save ~15–20 minutes of write-up per meeting
- ✓ Consistent, structured notes every time
- ✓ Clear owner & deadline on every action item
- ✓ A searchable record of past meetings

~~~15–20 min~~  
**under 1 min**  
to document a meeting

Figures are estimates based on typical manual note-taking, shown to illustrate the time saved.

HOW A PERSON USES IT

Four steps, no training needed.

1

Paste the transcript or upload a .txt, add a title

EXECUTIVE SUMMARY

Hartwell Skincare onboarding kickoff meeting established clear ownership and timeline for account setup, strategy development, and creative production. Ryan Walsh will provide Meta and Google Ads account access by tomorrow afternoon and brand assets by end of day today. Ben Okafor will conduct a full account audit within three business days, while Lily Shen develops a competitive strategy brief targeting end of next week (July 26), with the design team beginning creative templating once the brief is finalized. A check-in is scheduled for one week from the meeting date.

KEY DECISIONS

+ Add Decision

✓

Decided that strategy brief soft target is July 26 (end of next week)

✓

Decided to schedule a check-in meeting for one week from the meeting date

## KEY FEATURES

### 3 Every meeting is saved, History

Operational record

Past meetings are listed by title and date. Click any one to re-open, edit again, or re-export. A searchable team record, not one-off outputs.

### 4 Clean export, Markdown & PDF

Share anywhere

Export builds from the edited version, not the raw AI output. Download a tidy Markdown or PDF, or copy straight into Google Docs to drop in Slack or email.

## SECURITY & PRIVACY

- Data stored in a private database, not publicly listed.
- Transcript sent only to the AI provider, nothing else.
- Nothing shared publicly by default, only when you export.
- API keys stay server-side, never in the browser.

## LOW OPERATING COST

- ✓ No dedicated servers to run.
- ✓ Pay-per-use AI, per meeting only.
- ✓ Runs on free / low infrastructure tiers.
- ✓ Scales with usage, no fixed monthly bill.

**Hosting:** Cloudflare edge   **AI:** Claude (Anthropic), swappable   **Reliability:** validated + auto-retried

## ROADMAP

### PHASE 1 ✓

**Transcript → digest.** Live today: summary, action items, decisions, participants, editing & export.

### PHASE 2

**Search across meeting history.**

### PHASE 3

**User login & access control.**

### PHASE 4

**Slack integration & action-item reminders.**

### TRY IT YOURSELF
